# e-SLIDE

High Performance UHMWPE for Chain Wearstrips and Corner Tracks

e-SLIDE is the new ultimate Ultra High Molecular Weight Polyethylene (UHMWPE), developed and produced in-house by REGINA. Thanks to special lube additives compounded with the material, *e-SLIDE* provides superior sliding performance and excellent wear resistance of chains and belts in most critical conveying applications characterized by high-speeds, dry-running conditions, high abrasion.

MAXIMUM SLIDING PERFORMANCE AND LIFETIME

e-SLIDE ensures an extremely low Coefficient of Friction, stable over time, and a minimal wear rate in critical and high-performance applications, providing the following benefits:

- Elimination or minimization of lubrication
- Considerable increase of chains/belts, curves and wearstrips service life
- Significant energy consumption reduction in dry running conditions
- Maximized PV (Pressure-Velocity) limit in corner applications

e-SLIDE results in the lowest friction and wear rate when used in combination with *e-F.A.S.T.* and DK2™ chain and belt materials.
e-SLIDE PROPERTIES

- Polyethylene UHMWPE with molecular density of 9.000.000 g/mol
- Working temperatures: -40°C to +80°C (-40°F to +176°F)
