

## EXHIBITION PREVIEW FOR DRINKTEC 2017

Booth 343, Hall 5

### ABSTRACT

REGINA is pleased to introduce its latest innovations for the Beverage and Liquid Food Industry that will be presented at Drinktec 2017.

Continuous innovation and product excellence represent historic core values and pillars of REGINA CHAIN market mission.

REGINA latest innovations are the result of extensive research and development on advanced materials and applications, leveraging on historical close cooperation with key industry players in order to provide always top-tier technical performance, efficiency, ease of use, low environmental impacts.

We will be delighted to discuss in detail our solutions and innovations at Drinktec (Booth 343, Hall 5).

### PRODUCT INNOVATIONS

- **e-FAST: Ecological Friction Abating Sliding Thermoplastic Material**

Ultimate dry running acetal resin developed combining REGINA extensive field application knowledge and DuPont leading innovation capabilities on advanced synthetic polymers.

e-F.A.S.T. delivers a significant reduction and high stability of the *Coefficient of Friction* over time in dry or almost dry running conditions.

e-F.A.S.T. leaflet can be downloaded from REGINA [website](#) ("CONVEYOR" section, "CATALOGUES" menu).

- **LBP 1600 1" Pitch Series – Safety design**

1" pitch heavy duty belt with rollers featuring high safety and lightweight design (thermoplastic parts only) combined with superior working load.

Ideal for accumulating applications of multipacks, cases and cartons with heavy loads.

LBP 1600 leaflet can be downloaded from REGINA [website](#) ("CONVEYOR" section, "CATALOGUES" menu).

- **Biplanar 1710 Series – Zero Gap**

Special 50mm pitch biplanar chain featuring a continuous chain surface with no gaps. This results in improved product stability, reduced product damage and increased safety.

Ideal for conveying small components or hard-to-handle parts.

1710 Series Zero Gap product documentation can be downloaded from REGINA [website](#) ("CONVEYOR" section, "CATALOGUES" menu).

### DOCUMENTATION

#### ■ GENERAL CATALOGUE 2017

#### ■ PRODUCTION RANGE 2017

The *General Catalogue 2017* and the brochure of *Production Range 2017* include REGINA latest and complete portfolio of chains, modular belts and accessories for complete-line solutions in key industrial applications.

The *General Catalogue 2017* and the *Production Range 2017* are available in English and German language and can be downloaded from REGINA [website](#) ("CONVEYOR" section, "CATALOGUES" menu).

Please do not hesitate to contact Regina application engineering team with any question or support request.

Best regards,

*Regina Application Engineering Team*
