

EXHIBITION PREVIEW FOR GLASSTEC 2022

Booth C84, Hall 13

ABSTRACT

glasstec

**INTERNATIONAL TRADE FAIR FOR GLASS
PRODUCTION • PROCESSING • PRODUCTS**

**20-23 September 2022
DÜSSELDORF, GERMANY**

REGINA is pleased to introduce its latest innovations for the Glass Industry that will be presented at Glasstec 2022.

Continuous innovation and product excellence represent historic core values and pillars of REGINA CHAIN market mission.

REGINA latest innovations are the result of extensive research and development on advanced materials and applications, leveraging on historical close cooperation with key industry players in order to provide always top-tier technical performance, efficiency, ease of use, low environmental impacts.

We will be delighted to discuss in detail our solutions and innovations at Glasstec (Booth C84, Hall 13).

PRODUCT INNOVATIONS

- FliteTop® GS 1873T gripper chain

Gripper chain with special D-shape rubber pads which provide an even and fine-tuned force on the container for every application, allowing for a high chain wear resistance. It also eliminates the “kick-out effect” of containers, typical of some side-grip conveyors equipped with “long fingers” gripper chains.

Suitable for handling containers at different heights on elevators, lowerators, pass through conveyors and rinsers.

GS 1873T chain leaflet will be shortly available for download from [REGINA website](#).

- Matveyor® 1305 Series belt

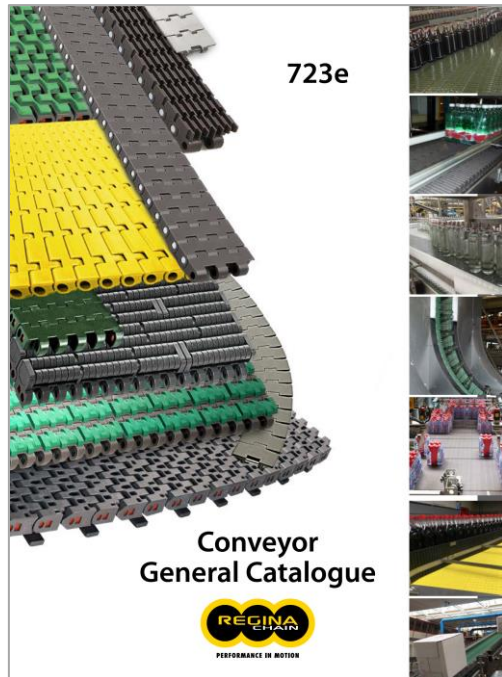

Matveyor® heavy duty 1”-pitch modular belt in imperial standard widths, featuring specially designed top surface with optimized edge radius and no gap between hinges, to ensure a superior container handling in linear and side transfer of containers.

12.7 mm thickness and special hinge design allow for a working load of 43000 N/m (2,946 lbs/ft), significantly higher vs. other belts available on the market for similar applications.

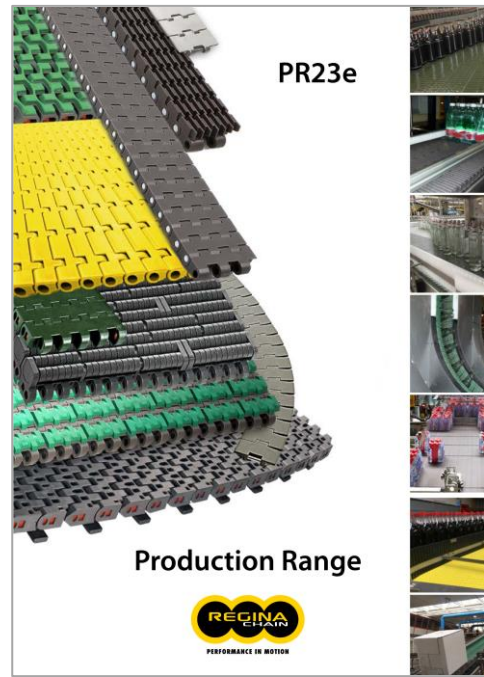

Ideal solution for handling loose and packaged products, such as glass bottles, aluminum & steel cans, in glass manufacturing, bottling and canning industries.

DOCUMENTATION

- GENERAL CATALOGUE 2023

- PRODUCTION RANGE 2023

The *General Catalogue 2023* and the brochure of *Production Range 2023* include REGINA latest and complete portfolio of chains, modular belts and accessories for complete-line solutions in key industrial applications.

The *General Catalogue 2023* and the *Production Range 2023* will be shortly available for download from [REGINA website](#).
