L'Amministratore Delegato

QUALITY POLICY REGINA CATENE CALIBRATE S.P.A.

The goal of our Company is to achieve complete customer satisfaction, both in terms of product reliability and service quality, by promoting a culture of continuous improvement.

To achieve these objectives, the Company has implemented a Quality Management System compliant with the UNI EN ISO 9001:2015 standard. This system is based on the fundamental principles of preventing non-quality, pursuing continuous improvement, and identifying the risks and opportunities resulting from these processes.

Greater attention is given to aspects considered particularly significant, such as environmental protection, biodiversity conservation, and the management of natural event risks.

I am personally committed to promoting the continuous training, education, and involvement of the entire company structure, so that it increasingly aligns with the principles of Quality, Continuous Improvement, and Risk-Based Thinking.

I grant the Quality Manager the authority, autonomy, and necessary resources to identify and resolve all Quality-related issues, as well as to promote, in cooperation with all company functions, the continuous improvement of the overall Quality performance.

I personally commit to ensuring the implementation of programs developed to continuously improve, simplify, and rationalize the management of the Company Quality System, and to carry out, at least once a year, internal audits and a documented management review, defining any necessary corrective actions and verifying their implementation and effectiveness.

I reserve the right to approve the plans developed to achieve the objectives and am committed to regularly monitoring their progress and the results achieved.

Specifically, I reserve the right to set specific, measurable objectives concerning company processes and their ongoing rationalization. The relevant indicators will be monitored by the respective process owners, coordinated by the Quality System Management function manager.

The Quality System Management function must communicate the Quality Policy to all company personnel and ensure that it is understood and applied, as well as the contents of the Quality Manual and the related procedures.

Carlo Garbagnati
President & CEO
